

HEAD'S FORUM – UG RESEARCH OPPORTUNITIES AND PG COURSE DEVELOPMENT

With the success of the Head's Forum last year, we would like to continue our tradition of organizing the Head's Forum every year. Students are welcome to attend to give comments, suggestions and feedbacks on how the Department could serve you better. Anything from courses, workload, advising, internship and research opportunities, outside classroom learning and experience, to career advising can be raised and discussed. This year, we are particularly interested in hearing from you about graduate courses and research opportunities for undergraduates. Views concerning graduate courses will also be forwarded to our External Examiner, who has kindly agreed to help us to review our postgraduate teaching. In addition to the Head of Department, the Chair-persons (or their representatives) of the Curriculum Development And Management Committee, the Departmental Research Postgraduate Committee, the Undergraduate Affair Committee, and the Staff-Student Consultative Committee will also attend. Please come to express your views.

Date: 14th Mar 2018 (Wednesday)

Time: 5:00 pm - 6:30 pm

Venue: Room 522, CYM Physics Building

Light refreshment will be provided.
